CONFECTIONERS

NATURALLY Sourced Sugar Alternative

PRODUCT CODE: 0331

PERFECT FOR FROSTINGS, GLAZES, FILLINGS, PUDDINGS & CURDS

Powdered Blend with Sugar Reduction

The Confectioners blend is perfect for use as a direct replacement for sugar in popcorn applications. It is soluble in water making this blend a perfect candidate for fillings, puddings, frostings, glazes, and curds. This powdered blend of Sweetly® Stevia can handle temperatures of up to 500 degrees Fahrenheit. This blend is energy and calorie-reduced and has a low Glycemic Index count.

Confectioners Blend Ingredients

Like all confectioners (powdered) sugars, an anti-caking agent is needed to prevent clumping. Sweetly® Stevia uses the anti-caking agent isomalt, a sugar-free and low-calorie agent that holds well in heat and humidity, making it ideal in the world of baking and confectionaries. This blend also includes sugar and Rebaudioside A, or Reb A, from our

high-quality and hand-picked Stevia Rebaudiana plants. Together, these ingredients form a dry blend and appear white in color. It is a direct 1:1 ratio for the replacement of sucrose in most recipes and applications.

Recommended Applications

The finely ground particles of the Confectioners blend make it perfect for creating sugar-free but still sweet foods that need a smooth consistency. It works best for baked goods decorations such as frosting, icing, and dusting, or it can be used to make the treats themselves like candy, fudge, and melt-in-your-mouth cookies! The Confectioners blend dissolves very easily and can be used in beverages. In the popcorn industry, the Sweetly® Stevia Confectioners blend can be used as a direct 1:1 replacement of sugar in popcorn applications such as microwavable bags, butter, and seasonings.

Sweetly® Stevia's patented process is water extracted – no ethanol, methanol, or rubbing alcohol. Our process is 100% natural and results in a product that genuinely tastes like sugar!
